

SW391 ALUMINIUM EDGING

THE IMPRESSIVE, UPSCALE LUXURY OF METAL - Aluminium Edging

One of the current, trendiest innovations in the industry is Scanwolf's Aluminium Edging. The surface of this edging is layered with a thin sheen of real aluminium material imported from Europe. This edging is light, strong and flexible, lending furniture a sleek, stylish and clean European flavour. Scanwolf's Aluminium Edging is also specially designed to cater to ordinary edge banding machines, with no extra equipment required. With so many shining attributes, it's little wonder why aluminium Edging is gaining increasing popularity in the industry.
